**Concern No.** 49310 **Concern Info** Concerned party stated that Jim Hertzog of Hertzog Meat Co. is composting old cattle feed in such a manner that the entire town is overrun with foul odor. The odor can be smelled at the four way stop sign in town (the only one) and at the business location. CP wishes Jim would use some sort of odor control, such as lime, to reduce the odors or compost the old feed in a different location on one of his other properties or at least a mile away from town. CP stated Jim owns multiple properties of 58 acres, 5 acres, and 50 acres so therefore he can place the compost elsewhere.

**Comments** No excessive odors were detected during the investigation. The facility had some questions about the operation of their lagoon, and the facility was advised to contact Water Pollution permitting for assistance.

### April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49356    **Concern Info** Caller reports that David Kelso is burning cars and car parts.

**Comments** Findings

I arrived at the property at approximately 12:50 p.m. on 4/19/22. A plume of smoke and small burn pile were visible on the north side of the property along W 146th Street. An individual in a small bobcat was moving items on the property near the burn pile. I parked along W 146th Street and introduced myself. The individual was Bradley Miller (a minor) who said he lived across the street and was helping David Kelso clean up the lot. I asked about what he was burning and he said furniture and trash. He directed me to David Kelso, who was in the office of David's Used Cars on the adjacent property.

I went to the office and met David Kelso and explained why I was there. David said that they were cleaning up the property from some flood damage and that they were only burning yard waste and trees and branches that had been brought down by the flooding about a year ago. I asked him to walk over the burn area with me and he agreed.

At the burn area I noted the metal remains of a mattress, some type of upholstered chair, possibly another piece of unidentified furniture, as well as some trash. There was no evidence of cars or car parts being burned. There was a large pile of metal items nearby, which David said they were going to sell as scrap metal. David questioned Bradley on what he was burning and reiterated he was only supposed to be burning yard waste. I explained to them what items were prohibited from being burned and they agreed to only burn wood or yard waste and stop burning other items immediately.

**Conclusions**

No evidence was observed of burning cars or car parts. However, burning of flood debris was occurring. Some prohibited items were burned, including a mattress and furniture. A Letter of Unsatisfactory Findings has been issued to David Kelso for open burning of prohibited items.

--------	--------------------	---------------	------------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49357    **Concern Info** David's Used Cars/Junkyard ...Large fires at night filling the valley with toxic lingering smoke and lingering smells of chemicals. This is right next to the creek and the junk cars are brought in and the oil and gas leaks into the ground. They cut down trees along the creek to heat their home. They stay in the campers that they haul in so I have an idea they don't have a septic system.

**Comments Findings**

Another concern on this matter was received and investigated on 04/19/2022. Below are the findings from ACE Concern # 49356.

I arrived at the property at approximately 12:50 p.m. on 4/19/22. A plume of smoke and small burn pile were visible on the north side of the property along W 146th Street. An individual in a small bobcat was moving items on the property near the burn pile. I parked along W 146th Street and introduced myself. The individual was Bradley Miller (a minor) who said he lived across the street and was helping David Kelso clean up the lot. I asked about what he was burning and he said furniture and trash. He directed me to David Kelso, who was in the office of David's Used Cars on the adjacent property.

I went to the office and met David Kelso and explained why I was there. David said that they were cleaning up the property from some flood damage and that they were only burning yard waste and trees and branches that had been brought down by the flooding about a year ago. I asked him to walk over the burn area with me and he agreed.

At the burn area I noted the metal remains of a mattress, some type of upholstered chair, possibly another piece of unidentified furniture, as well as some trash. There was no evidence of cars or car parts being burned. There was a large pile of metal items nearby, which David said they were going to sell as scrap metal. David questioned Bradley on what he was burning and reiterated he was only supposed to be burning yard waste. I explained to them what items were prohibited from being burned and they agreed to only burn wood or yard waste and stop burning other items immediately.

**Conclusions**

A Letter of Unsatisfactory Findings has been issued to David Kelso for open burning of prohibited items.

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49467 **Concern Info** CP reported that property owner was alleged to be burning demolition waste at his abandoned house. Albany City Council sat and decided that the abandoned house be torn down and the property owner meets the cost of tearing it down. The City Administrator contacted the property owner and informed him accordingly. Two or three days later, the abandoned house was burnt down. The property owner claimed he was burning yard waste and fire caught the house and burnt it down.

**Comments** No violations were found. The responsible party explained the house burned accidentally. No evidence was discovered by the Department of the Sheriff's Office to contradict the claim. Compliance assistance was provided regarding the remaining waste.

KCRO	4/26/2022	4/25/2022	Scott Chrisman	Oak Grove Jackson	Open Burning	DS
------	-----------	-----------	----------------	-------------------	--------------	----

**Concern No.** 49470 **Concern Info** CP states that the potential responsible party is bringing in C and D waste and furniture to burn. In the last 6 months he has burned pallets. The pile has limbs, C and D, and an easy chair has been placed on the pile, which the CP thinks will be burnt when it dries out.

**Comments** The Chrismans plan to remove prohibited items prior to burning any brush or household waste. No violations were observed.

**Concern No.** 49484 **Concern Info** A Bent Tree Harbor boardmember is reporting that the same person responsible for burning campers in the old quarry (LOW to Bent Tree Harbor issued August 13, 2021) is planning on cleaning up a mobile home lot at 11588 Caboose Circle by burning it. CP reports that the lot owner, J.R. Rule, stated that the property was going to be cleaned up and that Jeff Hensley, (possible renter/leasee) who has a son who may be living in the trailer currently said that they would be burning the trailer.

**Comments** ?Jeff Hensley was contacted and agreed not to burn. A letter will be sent to the property owners with information on open burning and solid waste regulations.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49516 **Concern Info** People are experiencing trouble breathing, tightness of chest, chest pain, wheezing and coughing. There is a dust that seems to settle that people are noticing because they are having to clean and dust more frequently to get rid of it. There is something in the air bothering neighboring tenants/businesses because the air quality is being effected by something that's being released into the air. The former Gm plant, which was then used as a storage facility, in the Leeds Industrial Plant, I believe was recently purchased by Amazon. I know that they are using the parking facility across the street for it for Amazon vehicles. It sounds like the plosives may be being used. You can hear what sounds like possible small explosions going off inside the building. Some of the neighboring business and tenants were gathered discussing their concerns. One of the elder people in the group, that has been in the area for many years, expressed that it's possible that there could be asbestos in the building. This individual is known to have been in that building several times over a span of many years. Something definitely seems to be causing health issues, since shortly after activity over there began. The bigger concern people seem to have, is that this is a huge building, a former production plant, and the clearing of the building could go on for quite some time. If that's the case, that means that there could be a lengthy time span where there could be prolonged release of more, of whatever, into the air. I hope that this is something that you guys can follow up on and check into, if it's possible to figure out what could be causing the health issues people in the area are experiencing. I'm not sure if it's relevant, or not, but there's also a water source nearby that in the event some type of contaminant or toxin is being release into the air could be effected.

**Comments** This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.??

**Concern No.** 50002 **Concern Info** Concerned party (CP) is concerned about the dust from the land owner south of them, believed to be operated for Suburban Lawn and Garden, being blown onto their property.  
  
Chris Kerr spoke to CP on 5/5/2022. CP reports that property to the south of them is removing dirt and running it through a mulcher and trucking it off site. CP says that the dust is very bad with high winds. CP states that they have tried to contact the CEO, Matt, and has left messages with his secretary but has not gotten any calls back. CP says that there is a pond on the property and would just like them to water when there are high winds.

**Comments** June 7, 2022:

Looking at the weather, I decided to investigate next week since the temperature should be in the 90s.

June 13, 2022:

I arrived in the area at 11:30 a.m. I drove along 800 Rd. At the intersection of 800 and 1901 Roads, there was an odor detected. It was light. A Nasal Ranger reading was not taken since the odor was too light and would not have been detectable at a 2:1. The wind was from the south at 5-10 mph. There was no violation of the odor regulations.

KCRO	6/9/2022	6/7/2022	Levi and Brenda Eigsti	Windsor Henry	Open Burning	CK		
------	----------	----------	------------------------	---------------	--------------	----	--	--

**Concern No.** 50193    **Concern Info** At the end of driveway burning of a demolition material.

**Comments** Upon my arrival at the site, I could see a smoldering pile of construction debris, which appeared to have been a house as there was an underlying foundation. Levi Eigsti admitted to burning down the house but stated that he was unaware of regulations that prohibited this type of burning. Levi and Brenda Eigsti were found to be out of compliance with the Missouri Air Conservation Law and its implementing regulations based upon observations made during the inspection. A Letter of Warning (LOW) was issued.?

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 50329    <b>Concern Info</b> There is a Lee's Summit School "Pleasant Lee" at 700 SW Persels Rd, Lee's Summit, MO 64081. There has been laboratory counter tops being demoed in that school for the last 2 weeks via sledge hammer with no air filtration or containment. Yesterday it was stated by the safety person Lori that those contained asbestos. The laborers seemed to be trying to get as much out of the building yesterday before the test came back positive. There have been many workers in the environment for these last two weeks while all that asbestos dust and pieces have been flying through the air. It is a McCown Gordon jobsite. Royal Construction has been removing the counter tops. I wonder what other things in the building have not been tested and also contain asbestos and have been hauled to a landfill improperly. They had a gas floor machine in the building taking up floors without proper ventilation as well. The job site is unsafe.</p>								
<p><b>Comments</b> Renovations were being performed at Pleasant Lea Middle School by McCownGordon Construction and their trade partner Royal Construction Services. An asbestos inspection had been performed prior to renovations and the laboratory counter tops determined to contain 18% chrysotile asbestos. However, due to a miscommunication, McCown Gordon Construction and Royal Construction Services believed no asbestos was present. Counter tops were removed using brute force methods including a sledgehammer from approximately May 31 to June 3. On June 6, the asbestos inspection was reviewed by McCown Gordon and it was discovered that the counter tops contained asbestos. Work was stopped. A certified asbestos contractor has been retained to remove the remaining counter top material and wipe down the affected rooms. Clearance air monitoring will be conducted. ?See the Letter of Warning for complete inspection details. A Letter of Warning has been issued to McCown Gordon Construction, Royal Construction Services, and the Lee's Summit R-7 School District for failure to thoroughly inspect for asbestos and for failure to remove asbestos containing materials prior to renovation. Refer to inspection report for additional details.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 50109    **Concern Info** There's lots of dust and smells coming from the asphalt company next door to my home.

**Comments** No violation found at the time of the investigation.

NERO	6/13/2022	6/13/2022	Robert Wooden	Eagleville Harrison	Open Burning	SB
------	-----------	-----------	---------------	------------------------	--------------	----

**Concern No.** 50120    **Concern Info** I have noticed Robert clearing out much of his collected metal junk and accumulating a giant pile of twigs, dried pine needles, and giant logs from the oak tree that he recently cut down. This pile is directly adjacent to my pine trees which are only a few feet away from my garage. This pile has remained in this location for some time. If he were to burn the pile of clippings and wood there, this would likely cause my pine trees to catch fire and could cause my house as well to catch fire. I am sending a few images that show the proximity of his trimmings to my pine trees and house.

**Comments** No violation of the open burning rules is being alleged. Made a courtesy call to discuss open burning requirements with the property owner.

NERO	6/16/2022	6/14/2022	Harriet Dashaw	Jefferson City Cole	Open Burning	RD
------	-----------	-----------	----------------	------------------------	--------------	----

**Concern No.** 50172    **Concern Info** Caller states that their neighbors have been burning household/residential waste and possibly other waste types periodically over the last four months. According to the caller, the household has stated that they intend to obtain trash service but have yet to do so. The caller is concerned about air quality resulting from the burning.

**Comments** No violations found during the investigation. The trailer is located on a lot that is owned individually and burning of household trash is exempt from the open burning regulation.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 50107 **Concern Info** The concerned party would like to report odors, dust and noise coming from MoSeal asphalt plant on rt HH outside of Fulton.

**Comments** No violations found at the time of the investigation.

SERO	4/19/2022	4/14/2022	Prairie Valley Landfill	Cuba Crawford	Odor	JW
------	-----------	-----------	-------------------------	---------------	------	----

**Concern No.** 49366 **Concern Info** The anonymous complainant reported multiple concerns from the Prairie Valley Landfill located in Crawford County. The complainant referenced odor concerns, the facility not covering waste appropriately (prior to closing hours), and concerns of stormwater runoff to the local watershed. Additionally, odor concerns were reported on the adjacent Asphalt plant that are permeating the CP'S residence. The range of odors stretch out at least 1.5 miles according to the CP, apparently focused NW of the facilities.

**Comments** Inspection started around 11:50 a.m. on 04/19/2022. The weather conditions were as follows, clear skies, 50° temperature, 36% humidity and little to no wind blowing 1 mph to the WSW. I drove Oak Hill Road with runs along the southeast side of Prairie Valley Landfill and the Capital Material Asphalt plant at a speed around 15 mph as well as making multiple stops to gauge odor, no notable odors were detected. This road allows for the clearest view of the landfill without being on the property. This facility takes their own odor reading and reported normal operations and normal loads over recent weeks. On site there was a faint odor at times, but no odor was detected with the Nasal Ranger over the duration of the investigation. The facility reported normal cell activity and equipment have been operating as normal with no malfunctions or problems noted. Areas that have been used very recently and covered have not been seeded due to rain and soil conditions, the facility is planning on seeding as soon as possible. The contact for Prairie Valley Landfill is Steven Wherry. Capital Material Asphalt plant also located on Oak Hill Road officially began production for the year on the day the concern was reported. According to a plant operator reached over phone on 04/20/2022 Capital Material Asphalt produced 800 tons of regular hot mix. Started running again on Monday the 18th when the plant ran a couple hundred ton of hot mix and Tuesday the 19th when the facility produced a couple hundred tons of cold mix. I was informed the cold mix may give off a diesel-like odor. There were no odor violations noted at or around Capital Material Asphalt.

No violations of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.165 Restriction of Emission Of Odors were noted.

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49529    **Concern Info** Open Burning.

**Comments** I arrived at the address given and met with the RP, who did not want to give his name. I gave the RP my credentials and explained the reason my visit . I asked the RP if he had been open burning anything recently. The RP replied that he burns some household waste, but also burns some demolition waste. As the RP described it me, he acquires small mobile homes, takes them back to his property, strips them/breaks them down, and burns parts of it. I asked the RP exactly what he had been burning and he responded with structural components such as wood, flooring/foundation, siding, etc. The RP had some tires set off to the side and told me that he does not burn tires.

At the time of my investigation, I could not see any remnants of a burn pile possibly used for demolition waste, but there was a small mobile home fairly well damaged on the property. I explained to the RP that burning household waste is acceptable, but burning the demolition waste from these mobile homes is a violation of Missouri's Open Burning Regulation. I told the RP that anything other than untreated wood from these mobile homes cannot be open burned and that he needs to take that sort of waste to a transfer station or landfill that will accept it. I spoke briefly with the RP about the dangers of asbestos fibers being released from the open burning of demolition waste and that the NESHAP Subpart M regulation for asbestos will apply if more than one structure is demolished within the same calendar year. If the RP chose to demolish more than one home in a calendar year, he would then have to abide by Subpart M by getting an asbestos inspection done as well as submitting notifications to the asbestos unit in Jefferson City prior to demolition. The RP agreed to no longer burn the demolition waste.

I encouraged the RP to contact me if he had any questions or concerns or if he needed guidance for anything. I also left the RP with some fact sheets/publications relating to open burning and demolition waste.

The fact sheets/publications I left with the RP were:

PUB2047 - Facts on Open Burning Under Missouri Regulations

10 Code of State Regulations 10-6.045 Open Burning Requirements

PUB2251 - Illegal Disposal of Construction and Demolition Wastes

The RP agreed to stop burning demolition waste. Will keep an eye on any information regarding the RP continuing to open burn demolition waste.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49757    **Concern Info** CP states RP is burning tires during the day and at night. CP states there are a large amount of tires being burnt. CP requests a phone call before we come out.

**Comments** There were two investigations of this concern; one was conducted on April 28, 2022 alone by Dawson Bennett and another, on May 4, 2022, including Josh Wilkerson. The investigation conducted on April 28, 2022 took place at approximately 11:30 AM.

Arriving at the address from the north side, I could see a large, blackened area on the ground in the backyard as well as a substantial amount of tire wire. There were "No Trespassing" signs on the property so I called out from the county road to try and get someone's attention inside. Eventually, a woman came outside to speak with me.

I gave the woman my credentials and explained my reason for the visit. The woman did not want to give her name, nor any contact information. I went on to ask the woman several questions regarding the concern of the open burning of tires on this property. The woman had no recollection of any sort of open burning that had been going on. The woman claimed that she didn't live at this address and was simply staying there for a short while. I mentioned the name Johnathon Turnbow, mentioned in the concern report, and the woman recognized the name. The woman claimed that Johnathon was at work, so I asked her to pass along some fact sheets (including open burning regulations and scrap tire management) and my business card to Johnathon when he returned to the address. After handing the woman the fact sheets and business card, I left the address.

On May 1, 2022, I received an anonymous email from an individual claiming that they had been handed fact sheets from the Department regarding the open burning of tires. The anonymous individual stated the property owner had been informed and the tenants would soon be evicted.

SERO	4/28/2022	4/27/2022	unknown	Odor Cape Girardeau	TR
------	-----------	-----------	---------	------------------------	----

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49499    **Concern Info** There is a pond right along the sidewalk on Bloomfield road that is completely covered in algae with a foul odor and lots of mosquitos already. The algae and scum overflows onto the public sidewalk and into the road when it rains as well. Are property owners required to care for bodies of water that they've let go into such a state?

**Comments** This concern does not involve a business which emits criteria air pollutants. The closest business to the location described is Dalhousie Golf Club. This office does not regulate Cape Girardeau County sidewalks, roads, ponds, algae, or mosquitoes. The Missouri Air Conservation Regulation 10 Code of State Regulations Restriction of Emission of Odors regulates sources of odor that involve air pollution. A pond that is overflowing because of heavy rains is not normally a regulated air source. It might be more effective to contact the County Commission for Cape Girardeau County and ask if this matter might be something that they would possibly deal with.

No violation of Missouri Air Conservation Regulation 10 Code of State 10-6.165 Restriction of Emission of Odors occurred.

SERO	4/28/2022	4/27/2022	Unknown	Pemiscot	Open Burning	DB	
------	-----------	-----------	---------	----------	--------------	----	--

**Concern No.** 49753    **Concern Info** The caller contacted the Environmental Emergency Response Spill Line to report the burning of hundreds of tires by the caller's next-door neighbor. The caller stated that the neighbor brings trailers full of tires at a time and then burns them in their backyard at least once a week. The caller stated that it appeared that there were thousands of steel rings from the inside of tires laying in the neighbor's backyard. The caller stated that Jonathan Turnbow, Steven Guy, Steve Guy Jr., and PJ McCloud all lived at the incident location. The duty officer referred the caller to the Department's Southeast Regional Office.

**Comments** The RP was issued an NOV (#SE2200012) for the open burning of an unknown amount of tires. The NOV is dated May 20, 2022. The required actions of this NOV state that the RP is to remove the blackened top soil from the burn area as well as the tire wire and dispose of them both at a permitted transfer station or landfill and to also get waste receipts from the disposal facility. Along with this, the RP is required to submit written documentation to the department explaining how they will dispose of the waste as well as explaining how they will prevent such events from happening in the future.

SE2200012

**Concern No.** 49755    **Concern Info** The caller contacted the Environmental Emergency Response Spill Line to report the burning of hundreds of tires by the caller's next-door neighbor. The caller stated that the neighbor brings trailers full of tires at a time and then burns them in their backyard at least once a week. The caller stated that it appeared that there were thousands of steel rings from the inside of tires laying in the neighbor's backyard. The caller stated that Jonathan Turnbow, Steven Guy, Steve Guy Jr., and PJ Mccloud all lived at the incident location. The duty officer referred the caller to the Department's Southeast Regional Office.

**Comments** This is a repeat concern of Concern ID# 1272.

The RP was issued an NOV (#SE2200012) for the open burning of an unknown amount of tires. The NOV is dated May 20, 2022. The required actions of this NOV state that the RP is to remove the blackened top soil from the burn area as well as the tire wire and dispose of them both at a permitted transfer station or landfill and to also get waste receipts from the disposal facility. Along with this, the RP is required to submit written documentation to the department explaining how they will dispose of the waste as well as explaining how they will prevent such events from happening in the future.

SERO	5/4/2022	4/28/2022	Timber Ridge Landfill	Richwoods Washington	Odor	TR
------	----------	-----------	-----------------------	-------------------------	------	----

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49872    **Concern Info** CP states they live 35 to 40 minutes from Timber Ridge Landfill and that they can smell the landfill really strong first thing in the morning. The smell is inside their house. Particularly yesterday (4-27-22) and today (4/28/22) around 6am. CP believes they are doing something at night that is causing the smell to get stronger because they do not smell it during the day.

**Comments** On May 4, 2022, I conducted this investigation. When I began at 11:34 AM the weather was cloudy and the temperature was 53 degrees Fahrenheit with a wind from the East Northeast at 6 miles per hour. The humidity relative to temperature was 82 percent. I drove mostly along State Highway H with brief departures to the Northeast (State Highway WW) and to the Northwest (Highway 47) to check for non-landfill odors. At the end of my investigation the weather was cloudy and the temperature was 54 degrees Fahrenheit with a wind from the East at 4 miles per hour. The humidity relative to temperature was 77 percent. No odor violation was noted. All odors were faint and the strongest odor noted was freshly mown grass. Odors of diesel exhaust from trucks on the highways were also noted.

On May 13, 2022, I spoke with Andrew Brown, Site Manager for Timber Ridge Landfill. He discussed with me that there recently had been new extraction wells being installed along with trenching activity to connect the new wells into the gas collection system at the landfill. He stated that they had brought 8 extraction wells back on line and had seen an increase in flow through to the gas collection system to the flare used as an air pollution control device at Timber Ridge Landfill. He expressed his hopes that this would reduce the potential for future odors from Timber Ridge Landfill.

No violation of Missouri Air Conservation 10 Code of State Regulations 10-6.165 Restriction of Emission of Odors was observed.

**Concern No.** 49604    **Concern Info** CP states that a sawmill has a fugitive sawdust problem. The particulate matter released is crossing property lines and impacting neighbors.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Comments** I arrived at the concern address at approximately 11:30 AM. I was able to speak with a Mr. Tim King who owns the sawmill. I gave Mr. King my credentials and explained that the reason for my visit was to investigate an environmental concern regarding dust leaving the property. The name of his sawmill is King's Logging and Lumber. The sawmill was operating while I was there. I could see no emissions coming from the sawmill during my investigation. The wind was blowing at 12 mph from the northwest, but was not stirring up any dust.

Mr. King has a large pile of sawdust at the southwest corner of the property. The sawdust is routed to the pile via a tube coming from the sawmill. The sawdust pile was fairly tall with fresh sawdust on top that was not being moved by the wind. Mr. King informed me that he has a regular customer who picks up his sawdust, but hasn't been out in a while due to the weather. The haul road/vehicular activity areas around the sawmill were drenched, muddy, and hard to walk on. It would be difficult for most vehicles to drive up to the sawmill and not get stuck.

Mr. King stated that he ordered some large, concrete blocks a few months ago to try and build up a loadout area that would also double as a barrier for sawdust. Mr. King told me that distribution has been very slow lately and he hasn't heard back about the blocks. Mr. King also informed me that he has been trying to cut down the sawdust pile with his fork truck/loader. I could see a path up to the sawdust pile on the south side where it looked as if a loader had driven up near the top of the pile. Mr. King told me that it has been hard recently to get up to the top of the pile since the rain makes the sawdust pile soft and he doesn't want to get his loader stuck.

I suggested to Mr. King that it may help to dig out the routing tube beneath the sawdust pile and move it to the side of the pile in hopes of leveling out the sawdust. I also told Mr. King to continue to take the loader up to the sawdust pile, when able, to cut down the height of the pile. There are quite a few trees surrounding the property that act as natural barriers to limit dust from leaving the property. I told Mr. King to be proactive about getting his regular customer to come back and begin transporting sawdust out of the sawmill. I also encouraged Mr. King to look for other customers nearby.

I left Mr. King with some fact sheets/regulations regarding dust emissions and encouraged him to contact me with any questions or concerns he may have.

The fact sheets/regulations that I left with Mr. King were:

10 Code of State Regulations 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin

**Monthly Air Pollution Control Program Detail Report**  
**Concerns Investigated Between**  
**April 16, 2022 and June 15, 2022**

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
			PUB2200 - Odor, Dust, Asbestos, Open Burning and Freon Emissions					
			PUB1291 - Dust Suppression on Unpaved Roads					
Conclusions								
Click here to open command menu [Ctrl + Down arrow].								
??I observed no dust from processes within the sawmill during my investigation. The likely cause of concern is the large sawdust pile at the back of the sawmill being blown by the wind toward the CP's home nearby. Mr. King is actively trying to cut down the sawdust pile as well as trying to construct a loadout area for customers to easily pick-up sawdust and transport it out. There is a delay on sawdust loadout due to frequent precipitation making it hard for vehicles to get up to the sawmill.

Monthly Air Pollution Control Program Detail Report  
Concerns Investigated Between  
April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49865    **Concern Info** CP states the RP is bringing in waste from the icecream factory and a slaughter house and dumping it on property behind the school. CP states the smell is overbearing and you can taste it when you are inside the school. CP states they spoke with the county commissioner and was told that its been too wet to turn the waste over into the dirt and that is why the sme is there.

**Comments** I began this investigation on May 6, 2022, at 9:44 AM. The weather was cloudy and rainy with a temperature of 59 degrees Fahrenheit. The humidity relative to temperature was 100 percent. The wind was from the North Northeast at 8 miles per hour. I drove through Morley, Haywood City, Blodgett and around the area of the concern to check for additional sources of odor. There were multiple areas of exempt activity in the agricultural category. Specifically, there are small concentrated animal feeding operations for chickens, cattle, and hogs. In addition to Highway 61, Scott County Roads 405, 450, and 446, State Route C, and State Route U were all travelled. I ended this investigation on 12:47 PM when the weather was cloudy and the temperature was 61 degrees Fahrenheit. The wind was out of the Northwest at 7 miles per hour. The humidity relative to temperature was 87 percent. No odor problems were noted.

I contacted Jeff Limbaugh by telephone on May 20, 2022. He stated that he land applies chicken litter and compost from Tyson (chicken feeding operation) and milk water from Unilever (ice cream plant). He owns 640 acres. He usually subsoil injects. He does not apply when he cannot properly apply. He stated that he knew of no unusual conditions around the time the concern was received. There could have been a north wind.

No violation of 10 Code of State Regulations 10-6.165 Restriction of Emission of Odors was observed.

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49919    **Concern Info**    Mr. Potts is bringing in copper wire and burning off the insulation. Smoke and odors are getting into the surrounding residences. Mr. McIrvin has called the Sheriff's Office and the Fire Department and was directed to contact MoDNR. Mr. Potts is bringing in copper wire and burning off the insulation. Smoke and odors are getting into the surrounding residences. Mr. McIrvin has called the Sheriff's Office and the Fire Department and was directed to contact MoDNR.

**Comments** I arrived at the address listed in the concern report at approximately 12:15 PM. The property was littered with junk and debris, but looking around I could see no evidence of any copper wire being burned. There was not a mobile home on the lot, but instead there was a camper. I approached the side door of the camper and knocked several times, but got no answer any of the times. Unfortunately, there wasn't even a door handle for me to hang some fact sheets and a business card on so instead I hung a door knob bag on a broom that was leaned against the camper. I tried to position it in a way that was noticeable. On my business card I wrote "please call me" in hopes that the individual living in this camper would reach out to me, but as of today, May 26, 2022, I have yet to receive a phone call.

The fact sheets I left in the door knob bag were:

Facts on Open Burning Under Missouri Regulations - PUB2047

10 Code of State Regulations 10-6.045 Open Burning Requirements

No one appeared to be home during my investigation on May 10, 2022. I left fact sheets and a business card with "please call me" written on it, but as of today, May 26, 2022, I have yet to receive a phone call or any other form of contact. While I was at the address, I looked around from where I could and saw no evidence of copper wire being burned or anything of the like.

Concerns Investigated Between  
April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49671 **Concern Info** Young kid maybe 16 or 17 years old took his plastic oil change pan and walked it across the street and dumped it on the side of the road just to the left of the chain fence directly across from his house. Dumped several quarts of oil there. Blue shirt, white hat and white short with vertical stripes. Kid had lighter colored hair. Maybe blonde.

**Comments** This concern is believed to involve a resident and residential property. It involved most probably what is termed a household "do-it-yourselfer" (see Title Code of Federal Regulations Part 279.20 (a)(1)). Used oil generators that are household "do-it-yourselfers" are exempt from 40 CFR Part 279.

SERO	5/12/2022	5/10/2022	Doe Run Buick Recycling	Boss Iron	Odor	TR
------	-----------	-----------	-------------------------	-----------	------	----

**Concern No.** 49873 **Concern Info** CP states they live 2 miles as the crow flies from the RP location. CP states there has been an extremely strong Sulfer smell coming from the RP location. CP states they can not sit outside at all. CP states people as far as Viburnam have reported smelling the sulfur.

**Comments** At the time of the investigation on May 12, 2022, at 12:20 PM the weather was sunny. It was 91 degrees Fahrenheit and the wind was from the Southeast at 4 miles per hour. The relative humidity was 39 percent. I drove by the Doe Run Company Buick Resource Recycling facility along Highway KK. I then drove on to Highway 32 and drove both east and west along Highway 32. I ended the first part of my odor observations at 1:02 PM. I drove to Viburnum for a lunch break and then I continued the odor surveillance from 2:00 PM to 2:36 PM. The weather was Sunny. It was 92 degrees Fahrenheit and the wind was from the South-Southeast at 4 miles per hour. The relative humidity was 37 percent. I drove along Highway KK in order to make multiple passes in front of Doe Run Buick Resource Recycling. No sulfur odors were noted during this investigation.

I contacted Margaret Crocker, Environmental Compliance Manager with the Doe Run Company on May 13, 2022. She stated that Furnace Operations are usually consulted when the Doe Run Company is made aware that an odor concern contact has been made. She further stated that reduced sulfur compounds may be the cause. The Doe Run Company does monitor ambient SOx emissions along Highway 32. She stated that some sulfur emissions were monitored on May 10, 2022, in the range of approximately 10 to 55 parts per billion.

No violation of Missouri Air Conservation Regulation 10 Code of State Regulations 10-1.65 Restriction of Emission of Odors was observed.?

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
SERO	5/13/2022	5/11/2022	Timber Ridge Landfill	Richwoods Washington	Odor	TR		

**Concern No.** 49871    **Concern Info** CP states odor from landfill is strong today. CP also states that it is the most concentrated usually between midnight and 6am.

**Comments** On May 4, 2022, I conducted this investigation. When I began at 11:34 AM the weather was cloudy and the temperature was 53 degrees Fahrenheit with a wind from the East Northeast at 6 miles per hour. The humidity relative to temperature was 82 percent. I drove mostly along State Highway H with brief departures to the Northeast (State Highway WW) and to the Northwest (Highway 47) to check for non-landfill odors. At the end of my investigation the weather was cloudy and the temperature was 54 degrees Fahrenheit with a wind from the East at 4 miles per hour. The humidity relative to temperature was 77 percent. No odor violation was noted. All odors were faint and the strongest odor noted was freshly mown grass. Odors of diesel exhaust from trucks on the highways were also noted.

On May 13, 2022, I spoke with Andrew Brown, Site Manager for Timber Ridge Landfill. He discussed with me that there recently had been new extraction wells being installed along with trenching activity to connect the new wells into the gas collection system at the landfill. He stated that they had brought 8 extraction wells back on line and had seen an increase in flow through to the gas collection system to the flair used as an air pollution control device at Timber Ridge Landfill. He expressed his hopes that this would reduce the potential for future odors from Timber Ridge Landfill.

Note: This was an anonymous concern with no specific information that was expected to augment the quality of an ongoing odor investigation at Timber Ridge Landfill that I started on May 4, 2022. For this reason an additional field surveillance was not conducted. During the May 4, 2022, inspection of Timber Ridge Landfill it was confirmed that the landfill is closed and the active areas covered from 12 Midnight to 6 AM and the landfill is not receiving trash during that time period.

No violation of Missouri Air Conservation 10 Code of State Regulations 10-6.165 Restriction of Emission of Odors was observed.?

SERO	5/23/2022	C & K Tree Trimming	Nodaway	Open Burning	DB
------	-----------	---------------------	---------	--------------	----

**Concern No.** 49918    **Concern Info** CP states the RP is burning tree waste.

**Comments** This concern is related to a previous concern that was investigated on March 21, 2022. That concern investigation resulted in a Letter of Warning (LOW) to the president of C & J Tree and Lawn Service, Mr. Carlos Escobar, dated April 7, 2022. That LOW listed required actions that were to be performed by May 16, 2022. I have not received any written documentation that would satisfy those required actions of the LOW. More recently, I've been in contact with Mr. Escobar's lawyer, Mr. James M. McClellan who is currently having Mr. Escobar's property surveyed for exact perimeter distances.

**Concern No.** 50083    **Concern Info** Caller reports odors from land application are causing issues at the nearby school.

**Comments** On May 25, 2022, I investigated this concern. When I began observations the weather was cloudy and the temperature was 81 degrees Fahrenheit. The wind was from the South Southeast at 16 miles per hour. The relative humidity was 67 percent. Observations were made from 2:00 p.m. to 3:05 p.m. Land application was taking place and there was a noticeable odor. The odor was evaluated with the nasal ranger several times from off property along State Highway U and along Highway 61 north; but no odor was detected at the 2:1 dilution ratio. At the end of my observations, the weather was cloudy and the temperature was 74 degrees Fahrenheit. The wind was from the South Southeast at 18 miles per hour. The relative humidity was 84 percent.

No violation of Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.165 Restriction of Emission of Odors was observed.

**Concern No.** 49946    **Concern Info** We drive through this small town daily twice a day to work. The sewer smell is so overwhelming on State Hwy 8 right near the main entrance to this town. This is literally so bad my adult son was driving and started getting sick from this smell just a bit ago as we drove thru. This is worse as the weather gets warmer.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Comments** I arrived at Leadwood, Missouri at approximately 11:40 AM. The CP stated that the Mayor, Ed Austin, was at fault for the strong odor and gave the address for city hall in the concern report. Given this information, I parked near city hall and began testing for odors using the Nasal Ranger. Prior to parking near city hall, I had rolled my windows down and tried to detect an odor with just my nose as I drove around Leadwood. I could not detect any odors whilst driving around the Leadwood area nor could I detect any odors using the Nasal Ranger.

?A few days earlier, staff from the department's wastewater section had been in the area and spoke with Kevin Brooks, Chief Operator for both water and wastewater for the city of Leadwood. I was able to locate the Leadwood wastewater treatment plant (WWTP) and talk to Mr. Brooks myself. I gave Mr. Brooks my business card and Mr. Brooks gave me his cell phone number which is (573) 518-4874. Prior to Mr. Brooks arriving back at the WWTP (he was at lunch when I had arrived), I once again used the Nasal Ranger just outside of the WWTP and again could not detect any odors.

When Mr. Brooks arrived back at the WWTP, he explained to me the likely reason for the odor that was present roughly one week ago. Mr. Brooks told me that he had turned on the blowers in his sludge holding tank and that it gave off a strong odor. The Leadwood WWTP is located right alongside Highway 8, which is where the CP had claimed the odor was the strongest. I explained to Mr. Brooks that I had driven all over the Leadwood area prior to meeting with him and detected no odors, even when using the Nasal Ranger.

Mr. Brooks informed me that the WWTP was in the process of getting some upgrades. Mr. Brooks said that the plant was fairly old, especially the sludge holding tank. I gave Mr. Brooks a fact sheet regarding odors and encouraged him to contact me if he ever had any questions or concerns.

The fact sheet given to Mr. Brooks was:

?PUB2200 - Odor, Dust, Asbestos, Open Burning and Freon Emissions

The cause of the odor was likely from Mr. Kevin Brooks, Chief Water and Wastewater Operator turning on the blowers in the sludge holding tank at the Leadwood Wastewater Treatment Plant. The odor had already subsided by the time department wastewater section staff arrived in Leadwood on the same day as when the concern was received. By my arrival, seven days after the concern was received, there was still no odor throughout the Leadwood area detectable by the Nasal Ranger.

**Concern No.** 50207    **Concern Info** The caller reports his neighbor is burning tires again. The RP has reportedly dug a pit and is burning tires in the pit and intends on burying tires in the pit. The facility is on County Road 407 South of the callers residence.?

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Comments** The following concern is a followup to a prior investigation conducted on April 28th and May 4, 2022 regarding the open burning of tires at the reported residence. A Notice of Violation (NOV#SE2200012) was issued on May 20, 2022 regarding open burning of tires. Refer to Concern# 1,272 for concern findings.

On May 31, 2022, Josh Wilkerson and Jesse Evans drove by the reported residence. A visible pit was identified from the roadside near the burned tire remnants from the prior investigation, though no visible smoke or evidence of additional burning of tires was identified. The prior burned remnants were still visible on the property, and had not been disposed at the time of investigation. No additional tires were identified being staged at the property at the time of investigation.

Josh Wilkerson attempted to contact Mr. Turnbow via phone but was unable at the time of investigation. Mr. Turnbow later communicated via text and advised that the current tenants should not have been conducting any further open burning of tires and to his knowledge had not conducted. Mr. Turnbow was limited in conversation at the time due to a health related issue.

Discussion with the CP and adjacent property owners referenced prior situations that trailers and/or pickup trucks were delivering tires to the property. It was discussed that should any identified tire related fires be identified that they should be reported to local fire/law enforcement and contact the Department.

#### Conclusions

?A pit was visible from the roadside near the burned tire remnants from the prior investigation. No open burning was noticed during this investigation. Nothing appeared to have been disposed of since the prior investigation. Communication was made to Johnathon Turnbow through text. According to CP and neighboring homes, tires were being brought in by trucks and/or trailers. It was mentioned that the local law enforcement/fire department should be a first contact of any tire fires.

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
SERO	6/9/2022	6/7/2022	Samual & Sherry Rowland	Rolla Phelps	Open Burning	HC		

**Concern No.** 50106    **Concern Info** Burning outright plastics an treated lumber.

**Comments** I arrived to the alleged offenders address around 12:00 p.m. I made a few passes around the property by vehicle and was unable to see anything that would cause the property owners to be in violation of any regulations. I pulled into the drive way and spoke with a woman named Heather at the location. I informed her of the allegations against the property and presented my I.D. We spoke in detail about the nature of the concern and I provided some information in the form of factsheets and the open burning regulations.

The information specifically provided were "Open Burning Under Missouri Regulations – PUB 2047", "Managing Construction and Demolition Waste – PUB 2045" and a copy of the Code of State Regulations Open Burning. I informed Ms. Heather that the property is allowed to burn vegetative and household waste that has been generated on property and that burning treated wood waste is prohibited by the open burning regulation of Missouri. Ms. Heather informed me that there is very little burning that occurs on the property and any lumber brought onto the property for construction projects are untreated and then treated once the project is finished therefore the waste wood would be untreated. ?

Assessors Office has property under two listed owners, which are Samual and Sherry Rowland or Steven and Benita Beam.

Insufficient? finding to consider a violation or further investigation.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 50304    **Concern Info** CP states neighbor is burning copper wire in back yard that is putting off a horrible smell and giving his wife a migraine. He called the Fire Dept and they said to contact DNR

**Comments** This is a follow-up concern for the same individual as described in ACE ID 49919 which was investigated on 5/10/22. On June 13, 2022, Hayden Cassinger and I arrived at the RP's address at approximately 1:50 PM. I saw the same cluttered yard that I had seen before. On the ground, there were very few snippets of wire, but there were no burn marks on the wire. I saw what looked to be a burn barrel that had several large holes throughout it.

I knocked on the door of the camper located on the lot several times, but no one answered. After waiting for several minutes, I left some fact sheets/publications in a door bag along with my business card with "please call me" written on it. I took a few photographs of the property from the road and then we left.

I talked to the CP a few days later who informed me that he acts as security for the trailer park. He told me that Mr. Potts (RP) has been in and out of court regarding his eviction. The CP also gave me contact information for the owners of the trailer park. Chris Owens ((573) 429-8962) and Tom Pollins ((573) 429-9854) are the owners of the trailer park. I spoke with Tom Pollins who referred me to the property manager, Tracy Barber ((573) 718-8859) with 10 Mile Management Co.

Tracy Barber told me that Mr. Potts always paid his rent, but has always been troublesome with the burning. Tracy confirmed that Mr. Potts has been to court over the eviction and says he's planning to move out soon. Tracy also said that law enforcement/fire departments would not go out to the address because the trailer park technically has a private drive.

\*\*I did not submit this concern for several weeks to give Mr. Potts some time to contact me. As of today, July 8, 2022, I have received no contact from Mr. Potts.\*\*

**Conclusions**

Click here to open command menu [Ctrl + Down arrow].

??No clear evidence of insulation being burned from wire, but I did notice some clean wire around the property as well as a very weathered burn barrel. Mr. Potts has been evicted from the property, but is going through the courts over the eviction. I have contact information for the two owners of the trailer park as well as the property manager.

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
SERO	6/16/2022	6/10/2022	Royal Oak Charcoal - Ellsinore Plant	Ellsinore Carter	Other		HC	

**Concern No.** 50411    **Concern Info** Concerned party reports that the Royal Oak plant in Ellsinore is not being properly maintained. A fire resulted in damages that were not repaired. He is concerned that the facility is not in compliance with the air regulations and is finding ways to avoid detection by slowing fan speeds during the day. The facility's kilns along with the pipes that connect them to the afterburners leak. Creosote leaks out as a result. The reheat sections of some of the kilns are also leaking creosote.

**Comments** An investigation was conducted by Jan Dunlap-Chronister and myself on June 16, 2022. Multiple violations were noted on our investigation. Leaks that allow emissions to escape the system were detected in multiple locations throughout the kiln reheat system. The same problems with the reheat system is allowing creosote to accumulate within the system which leads to the liquid escaping the system. Another investigation was conducted on July 11, 2022, and many of the same violations were observed from the road side while inside a vehicle. Photos were taken during the investigation to be used in the report. The photos used in the concern document were provided by Lance Kearby the concerned party. An RNOV have been issued and submitted on 7/12/2022.?

A Referral Notice of Violation (RNOV # SE2200020) was issued on July 12, 2022. An additional investigation conducted on July 11, 2022 was added to this RNOV.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 50105    **Concern Info** Jan Chronister with SERO took this concern. CP - Rick Henderson piled furniture out with a front loader a bunch of furniture and is burning it.

**Comments** I arrived at the location of the concern around 12:15 p.m. on 6/15/2022. Upon arrival I took some pictures of the burn pile described in the concern and did see evidence of furniture or bedding had been burned in that pile. I spoke with a resident of the trailer park, Charles Haltinchel. Mr. Haltinchel informed me that he had lived at that location for about a year and that the pile had been accumulating that entire time. He had not noticed any large deposits onto the pile like the concern implied, he did not have any information on who burned the pile. After Mr. Haltinchel gave me all the information he could he directed me to the owner of the property Glen Sapaugh. I spoke with Mr. Sapaugh at the used car dealership that he owns and provided the information I prepared for the alleged burner. Moreover, I spoke with Mr. Sapaugh about the information I provided which was the Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements and "Facts on Open Burning Under Missouri Regulations - PUB 2047." He implied that he did not know who burned the pile, Mr. Sapaugh was very receptive to the information provided and said he would distribute its contents to the residents at the trailer park. Mr. Sapaugh did inform me about some neighborly disputes over property boundaries and access that have taken place during the last couple of months. On 6/16/2022 I reached out to Rick Henderson to inform him of my findings and to try to gain any further information. Mr. Henderson informed me that he believes the pile appeared overnight around three months ago, but was unable to provide any more information than that.

There was evidence of burning furniture or bedding and other prohibited items, but I am unable to locate the Responsible Party at this time. If this becomes a recurring issue there should be more investigations at this site. ?

Photos are in concern Document Set.

**Concern No.** 49344    **Concern Info** Caller reported that people were spraying chemicals inside of his apartment building, which were causing respiratory problems. He has contacted the police, health department, FBI, citizen's service bureau, the building owner, and nothing has been done. I asked who was conducting the spraying and for what purpose. He said that someone who lives in the building has people come over when they're gone and they spray inside the building. He doesn't know what they're spraying for but believes they are spraying to intentionally harm him. He said it smells like wasp spray. It goes through the HVAC system and throughout the building. He said his neighbors have experienced it as well but have not called to complain. He's tried putting up cameras but they were taken down. I explained that our department regulates businesses, and that if these people were maliciously spraying chemicals to harm him, he needs to keep contacting the police. They may be using chemicals to manufacture illicit drugs, or cover up the smell of meth manufacturing. I gave him the number for the Missouri meth hotline with the Missouri Highway Patrol. I explained that our department could not investigate this and we would not be able to enforce our regulations in this instance. Caller thanked me for my assistance.

**Comments** Referred caller to MO Highway Patrol due to potential for illicit drug manufacturing

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49342    **Concern Info** Forwarded from the EPA:

Alleged Violator's Name: St Clair Senior Apartments  
Alleged Violator's Address: 155 Crescent Lake Rd apt 104  
Alleged Violator's City: Saint Clair  
Alleged Violator's State: Missouri  
Alleged Violator's Zip: 63077

Tip or Complaint: Black mold in the walls of the apartment. Roof leaking down the wall in the bedroom and carpet was wet and now believe that there is mold under carpet. The outlet between the bedroom and living room has mold coming out of the outlet.

Violation Still Occurring? Yes

State DEP/DEQ/DEM Notified? No

**Comments** Our department does not regulate mold. I forwarded the concern to the Franklin County health dept.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Concern No.</b> 49477 <b>Concern Info</b> Miranda 4/21/22- The call was from an anonymous citizen they wanted to submit a concern about their neighbor burning and collecting tires on their property. They are worried vector borne disease causing insects, and burning fumes. The burning occurs at night and the burn pile cannot be seen from a public road, however the scrap tires can. It is worth mentioning that the Winfield-Foley Fire Dept. recommended the concern party contact us, and the sheriffs dept has been to the source of concerns property multiple times for unrelated reasons, the concerned party believes the Sheriffs dept. visits are drug related. The concerned party stated they were unsure if there is a history of violence.								
<b>Comments</b> Miranda 4/22/22: After consulting with Solid Waste it was decided that I would send a Compliance Assistance Letter with open burning and scrap tire facts sheets, since this is their first time receiving a concern. The address was written down by SW to potentially check out in the future and reference if another concern is called in. I also informed the concerned party that if the fire dept puts out a fire on the property and writes down the materials being burned in their report we can use that information in the event that the source of concern continues burning.								
SLRO	4/22/2022	4/22/2022	Unknown person/persons		Fugitive Particulate Matter	JM		
Jefferson								
<b>Concern No.</b> 49475 <b>Concern Info</b> Caller stated that there was a house which caught on fire. Now there is a truck which is using a vacuum system to remove material from house and into a dumpster. The caller is complaining about dust produced at dumpster. The caller indicated there was no identifying information on the truck. The caller couldn't give an address about the house other than Seckman Road and Parkview.								
<b>Comments</b> 4/22/22 Talked with Rock Community FPD, there was a fire at home at this location. Cellulose insulation caught on fire during rehabbing of home. The Fire Marshall was unable to find out the company doing work. Based on this information, I think the rehab company is removing all the burnt material. The Fire Marshall indicated he lives in the area and has observed the dumpster. If any info on fire is needed, the report number is 2022-67.								
4/22/22 Concerned party called back to inform us that they called code enforcement and found that the company had permits to do the work. No further action necessary.

SLRO	4/22/2022	4/22/2022	Unknown	Lincoln	Open Burning Residential Waste Disposal Scrap Tire Dump	JM		
<b>Concern No.</b> 49832 <b>Concern Info</b> Caller stated that there is open burning of tires and mobile homes down the road from their location. The burning takes place at night. The fire department has been contacted and responded to situation. Caller noted that an electric pole was damaged at one point. In addition to the open burning, caller is worried that sparks from fire could damage them.								
<b>Comments</b> 4/22/22 JEM - I have contacted Arron Lee, Chief Winfield/Foley FPD, who is sending last two or three incident reports. Chief Lee indicated the fires have going on for about a year. I contacted Quiver River Electric and requested incident report if available regarding the electrical pole. As they are probably burning tires, in addition to mobile homes, should include Solid Waste. 4/26 contacted Lincoln County Sheriff's department. They have no calls to the area re: burning. They will accompany to location if necessary

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49772    **Concern Info** April 25, 2022, the department received an environmental concern from Chief Matt Krutzch, the Fire Chief with the Antonia Fire Protection District. He informed us that the property at 4521 Ridge Road was taking in large amounts of vegetative wastes from other properties and burning them. On April 26, 2022, Chief Krutzch sent the incident report from April 23, 2022, which detailed their experience with responding to and attempting to put out the fire.

**Comments** On April 26, 2022, I reviewed the incident report that Chief Krutzch sent to me via e-mail. The report detailed how the reporting parties responded to a large brush fire. The property is described as "a vacant lot about .35 acres in size that has been used as a dump for brush and yard waste with some trash mixed in on the back side of the pile that is on fire." The report also states "the entire area that the crews are working is a hillside that has been filled in with yard waste and brush over the course of several years to create a level lot. Most of the piles on top of this area are now burning." Chief Krutzch also stated by e-mail that after speaking with a concerned neighbor, he learned that the property owner's son has been accepting loads of yard waste from other properties, acting as a commercial collection center for vegetative waste.

10 CSR 10-6.045, "Open Burning Requirements," prohibits the open burning of household waste originating from another's property. The incident report describes trash mixed in with the vegetative waste that has been brought in from other properties. Commercial and noncommercial collection operations where vegetative waste originates off-site are also subject to additional regulations under 10 CSR 10-6.045 (3)(E). This type of burning must occur at least two hundred (200) yards from the nearest structure not owned by the party conducting the burning, unless an Air Curtain Incinerator is used and waivers are obtained, or the fire department provides approval. I examined a map of the area and determined that the 200 yard rule could not be complied with on this property. Additionally, if conducting this type of burning in an ozone non-attainment area from April 15 to September 15, an Air Curtain Incinerator must be utilized. Jefferson County is within an ozone non-attainment area, and burning most recently took place on April 23, 2022. An Air Curtain Incinerator was not being used per the fire incident report. I reviewed the property on Missouri Parcel Viewer and verified that the property belongs to Deborah Barger, and the mailing address is the neighboring property at 4525 Ridge Road, Barnhart, MO 63012.

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49773    **Concern Info** E-mail sent 4/26/22: "Hello David I was outside cutting grass today and I seen the machine smoking second stack from the right so on the east end it started smoking about 6 and 6:30 it was smoking pretty heavy. Both were more than 10% opacity however I didn't have my phone because I didn't want it with me in all the dirt so I have no video. Black smoke was coming out of the machine from 6 pm forward I just came inside and didn't see any smoke

Thanks for your help in resolving this matter Danny Callahan  
"

**Comments** I have investigated this concern at Animal Care Service Inc. several times in the past, and have issued one LOW to the facility for an opacity violation that I observed on March 31st 2022. I investigated this concern on 4/27/22. Since the opacity was observed in the evening, I waited until the end of the workday. I arrived at Animal Care Service, Inc. at 5:30 pm. I did not observe any significant opacity coming from any of the stacks. I did not observe any noticeable odor from where I was at, on Challenger Drive to the east of the facility. I waited for 30 minutes until 6:00 pm. I did not see any significant opacity during my visit. I e-mailed Danny Callahan to let him know and told him to inform me of future violations.

SLRO	4/27/2022	4/27/2022	James and Darlene Darington	Pacific Franklin	Open Burning	DR
------	-----------	-----------	-----------------------------	------------------	--------------	----

**Concern No.** 49474    **Concern Info** Caller reported that their neighbor keeps burning something that creates a large amount of black smoke and causes strong odors and respiratory issues. Burn around once per week. They have tried contacting the fire department but nobody has come out. They typically burn late in the evening.

**Comments** First time offence; sending a compliance assistance letter and fact sheets to the property owners. Told caller that the best thing to do is have the fire dept. come out, and then contact us.

SLRO	4/27/2022	4/27/2022	James Bressie	Foley Lincoln	Scrap Tire Dump Open Burning	TL

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49776    **Concern Info** An anonymous caller wanted to report a scrap tire dump in Foley, MO in Lincoln County. They observed the tires on their way home. What started out as a few tires has since escalated in over 200 (that is what they estimate, they are unsure as they have always been driving when they observe it). They first noticed tires accumulating about 3-4 months ago. The caller stated that there are potential burning issues at the site and evidence of burning, although the CP has not seen tires actually being burned. The tires vary in size and are located right along Burr Oak Road.  
  
Following their recent observation, the CP looked up where the tires are being dumped and discovered it is 259 Burr Oak Road. Further investigations shown the property is owned by James Bressie.

**Comments** 04/27/2022 Researching address and location. (TML)

05/03/2022 Robert and I observed the property and located 3 different scrap tire piles. Also observed was a trailer home with scrap tires located inside. There was approximately 100 tires in total but was not able to identify how many were located in the trailer home. An open burn site was observed on the property. Unable to make contact with property owner. (TML)

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49774    **Concern Info** Online EPA form submittal: "Animal Crematorium near complainant's house causes such odors that it makes it difficult to breath. Stated that it is causing health issues and that the facility operates at night mostly."

**Comments** I have visited this facility several times in response to the same concerned party. I have issued the facility a LOW for an opacity violation in March, and have been in consistent contact with the concerned parties, Darrell and Danny Callahan. I visited the property most recently on April 27th in response to the same concern. I did not observe any opacity or odor at that time. Of all my trips to the facility (4) I have never experienced a strong odor, even when the opacity was strong.

?On 5/5/22 I called Danny Callahan and left a voicemail. I explained that we were forwarded his concern to the EPA. I explained that I went to the facility last week and did not find a violation, and that I had sent him an e-mail to let him know of my findings. I asked him to provide more information about when the opacity was at its worst so that I could plan my visit. I explained that odors would need to be extremely strong to be a violation. I also explained that at night, it would be impossible to document an opacity violation. I told him that I would keep going out to the site as long as it continued to be an issue, but that I needed more information and asked him to call me back or e-mail me.

5/18/22 I still had not heard back from Danny Callahan. I visited the site around 3-4 pm. I was accompanied by Tate Lofdahl, Environmental Program Assistant. We did not observe any significant opacity coming from any of the stacks at the time. The incinerators were running, which we could tell by heat coming from the stacks, but there was only approximately 5% opacity. There was no noticeable odor at the time. I e-mailed Danny Callahan to let him know what we found, and told him I would continue to stop here to observe the opacity any time I was in the area.

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Comments** ?I e-mailed the concerned party back:

"Hi Nina,

We received your inquiry regarding a marijuana growing facility opening near your house. I noticed you are located in St. Louis County- the county actually has its own Air Pollution Control Program and can enforce air regulations that are stricter than the State of Missouri's. They'll be able to answer your questions better than I can.

You can contact the St. Louis County APCP at 314-615-8924 or by e-mail at [AirPollution.DPH@stlouiscountymo.gov](mailto:AirPollution.DPH@stlouiscountymo.gov). You can find out more information about the agency on their website at <https://stlouiscountymo.gov/st-louis-county-departments/public-health/environmental-services/air-pollution-control/>

I can tell you that at the state level, marijuana growing operations are not subject to the same exemptions that most agriculture operations operate under. As such, we can enforce our odor regulations, and depending on the size of the facility and the potential emissions, they may need to apply for a permit. The county may have other requirements as well.

I hope that helps - please let me know if you have any other questions. Thank you,"?

------	-----------	-----------	---------	-----------------	----------------------------	----

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49777    **Concern Info** Today people at a private residence house located at 728 State HWY J Troy, MO 63379 have been burning trash and tires all day long. The people at this address were accumualting the trash and tires for several years. An individual from SLRO/DNR who visited the site before told the concerned party to call SLRO if the trash and tires get burned in the open. This is the first time the open burning happened. It smells bad and a lot of smoke in the area. Fire Department in the area was not notified. The person wants to remain anonymous.

**Comments** 5/11/22 DBR - I left a voicemail with Lincoln Co. Fire Protection District, asking if anyone responded to this fire and if I could get a copy of the incident report. Also sent concern to solid waste/scrap tire unit for potential coordination.

5/12/22 DBR - I received the fire incident report from Donna with the Lincoln County Fire Protection District #1. The report indicated that the tires were not burned. The person was burning wooden furniture and other wood waste. When they were informed of the regulations, they pulled the furniture out of the fire and agreed to only burn untreated wood. I notified the solid waste unit and they agreed that onsite investigation was not necessary since tires weren't being burned, but gave me a fact sheet to send. I am sending the property owner a compliance assistance letter, an open burning fact sheet, and a scrap tire fact sheet.

SLRO	5/12/2022	5/12/2022	Scrap Mart	Jonesburg Montgomery	Fugitive Particulate Matter	DR
------	-----------	-----------	------------	-------------------------	-----------------------------	----

**Concern No.** 49779    **Concern Info** Scrap Mart in Jonesburg is creating fugitive emissions from their site. The concerned party is creating smoke, insulation dust and also debris is blowing off the site

**Comments** I researched the property and found no air permits for the facility. The facility had received a land disturbance/water pollution concern previously, was investigated, and obtained a land disturbance/storm water permit. I found contact information for the facility, called, and spoke with Chris Kehr, owner. I explained that we had received a dust concern from the property. Chris said he was not surprised, as there was a neighbor who complained frequently. He said there was little dust at the property. I asked if they shredded at the property, and he said they did, but it was a 'wet' system that produced no PM emissions. The only dust, he said, came from the gravel roads around the facility. I explained that since this was the first concern of this type that we were receiving, that we would utilize compliance assistance. I asked for his e-mail, and sent him a copy of the fugitive emissions regulation and a fact sheet on controlling dust from unpaved roads. I explained that future concerns would be fully investigated.?

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49770    **Concern Info** Online concern form submittal:  
Date of Incident or Date First Noticed  
09/01/2019

Please describe your concern, including the location on the property.  
I have been doing some reading on open burning in Missouri and more specifically in the St. Louis Metropolitan area. I believe my neighbor is in violation.

I live at 1148 Dorothy Pl, Catawissa, MO 63015, neighbor is directly behind me at 1160 Dorothy Pl. Another neighbor to the side of me at 1152 Dorothy Pl stated that the residence at 1160 owns a firewood business. The husband or staff will bring trailers full of small off cuts that I guess cannot sell and will set them on fire in their backyard. The smoke clouds are massive and each burn can last 2 to 5 days continuously even while they are gone or sleeping. Smoke most often travels north or south, houses in their path. I sit east of their property and while I do not deal with visible smoke, the smell of a wet chimney fills the house and my garage. The garage can smell for days. I would estimate the burns to happen about once a month, year round. Colder months can lead to more than 1 burn a month.

Here are coordinates you can enter in google maps that shows the burn site. I actually did get a view of it the Saturday before Thanksgiving of last year, 2021. Same neighbor in question decided to burn dead growth surrounding their septic pond and the fire got away from him. My house and most of the immediate lawn was engulfed in smoke. After helping put out the fire I left for vacation an hour later, otherwise I would have complained about that. I am only emailing about the fire pit now because I didn't know what to do and early on gave them the benefit of the doubt that maybe they were burning yard waste or clearing out some trees from their roughly 3.3 acres. I did email St. Louis County Dept of Public Health but they said they only have jurisdiction over St. Louis City limits. (see SharePoint for full report)

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Comments** 5/16/22 DBR - Looked up property on parcel viewer, owner is Denise Overman (same last name as what concerned party indicated). Property is outside of the ozone non-attainment area. Owner appears to be operating a collection center. Would need to follow 200 yard rule when burning anything that did not originate from their property.

5/16/22 MSC- I called the Jeremy Overman and left a voice mail explaining the following referencing PUB2047 Open Burning of Trade Waste: Untreated wood must be used, open burning can only take place from sunrise to sunset this includes smoke, the open burning must be supervised at all times, the burning must take place 200 yards from the nearest structure not owned by the party conducting the burning. I also mentioned I would mail a fact sheet to the address and that he could call me back with any questions and left numbers to reach me.

**Concern No.** 50253    **Concern Info** E-mail on 5/27/22: "I just wanted to let you know I seen smoke again today about 4 pm it was quite dark it was clearly a violation. I wasn't able to have my phone as it's on the charger. However it was very visible and even thicker black smoke than the last video I sent you."

**Comments** 5/27/22 ?I responded to Danny's e-mail "Thank you Danny. I'll get out there sometime this week around 4 pm and do an opacity reading. Probably either today or tomorrow depending on my schedule. I'll let you know what I find."

5/31/22 Danny replied at 1:30 pm "I appreciate you coming out. It's smoking right now I don't even have time to take a video as I have an appt?"

I immediately left for the facility and arrived around 2:00 pm. I did not observe any opacity coming from any of the stacks. I did not observe any noticeable odor I waited for approx. 30 minutes before leaving.

I e-mailed Danny to let him know that I did not find any violations.

6/1/22 I called Animal Care Service and spoke with Tom Foy Jr., owner. I explained that we received another opacity concern yesterday around 1:30. Tom said they were having some issues with one of their incinerators and had scheduled a maintenance appointment soon. He was upset that we keep receiving concerns and said that it was probably because their neighbor was getting ready to sell their house. I explained that we would keep investigating each concern, and all they had to do at the facility to protect themselves against enforcement action would be to keep an eye on the opacity, and shut the incinerators down if they noticed any smoke. I explained again that we do a 6 minute opacity reading, so a small puff of smoke with likely not constitute a violation. However, I have observed consistent, strong opacity coming from the stacks before. Tom explained that they were having a camera and alarm system installed that should take care of the issue.?

## Monthly Air Pollution Control Program Detail Report

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 50252    **Concern Info** Mr. James Waldo contacted the department with a concern about his neighbor stockpiling yard waste and household items (chairs, plywood, cardboard) in order to burn. The neighbor, Scott Frederich, has burned yard waste items on the property before. I explained to Mr. Waldo that in Jefferson County that burning yard waste is legal, however burning trash is not. I offered to give him the number for Jefferson County Division of Solid Waste, but he already has it and has talked to them. I also explained to him that we could not do anything other than sending a letter unless he has burned the aforementioned items.

**Comments** I drafted a letter to Scott Frederich and provided compliance assistance on open burning. - Robert Andrews?

SLRO	6/1/2022	6/1/2022	Jimmy, owner of all the properties on Valley Drive	Lincoln	Open Burning	JM	
------	----------	----------	--	---------	--------------	----	--

**Concern No.** 50250    **Concern Info** The caller said that there has been open burning involving construction and household materials from demolishing mobile homes and possibly tires. The owner of the land has several old mobile homes on Valley Drive. He has been demolishing the mobile homes to get rid of them for several months now. The caller indicated the first name of the person is Jim and she does not know his full name nor his mailing address. Foley Fire Department puts out the fire every time this happens. The Fire Chief (Aaron - 636 566 8406) told me that there is nothing they can do to stop the owner legally from burning his own property. The fire chief told me that the person who does this is never at the site. He starts the fire and disappears. The fire chief said there may be old construction/insulation materials that may contain asbestos. The people residing in the area are worried about the effects of breathing asbestos.

**Comments** 6/1/22 DBR - I reviewed the properties on Missouri Parcel Viewer. They do not appear to be owned by the same owner. I recognized the names - John Mullen recently worked a similar concern and on 5/26 we mailed compliance assistance letters to every homeowner on this street.

6/2/22 JM - A compliance assistance letter was submitted to Robert and Linda Gladney. A Freedom of Information request letter is being submitted to the Winfield/Foley FPD for information on the FPD's visits. Further action determined based on the FPD reports.

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
SLRO	6/2/2022	6/2/2022	Scrap Mart	Montgomery	Fugitive Particulate Matter	DR		

**Concern No.** 50256    **Concern Info** The CP alleges that Scrap Mart in Jonesburg, MO is creating fugitive dust and smoke from the operation. This is the second concern received about this operation from the same CP. The first concern was anonymous.

**Comments** 6/2/22 I called Stan Reams, concerned party. He stated that a massive amount of smoke was being created from crushing cars and engine blocks. He said they sometimes run water for the crusher but often times they do not. He said the crusher runs 6 days a week sometimes, but also that it breaks down frequently. He also said they had a pond on the property where oil and other runoff from vehicles accumulated, and that the pond overflows regularly and causes oil to run through the fields and into Long Creek and Camp Creek, and eventually the Cuivre River.

6/7/22 I visited the site. Scrap Mart Jonesburg has no construction or operating permits and has never been inspected by the SLRO source air unit. I was accompanied by Heather Johnson, a water pollution inspector. I met with Lucas Kendall and described the purpose of our visit. I asked if the facility had done an engineering assessment to determine the facility's Potential to Emit (PTE), which would determine if a construction/operating permit through the APCP was necessary. Lucas explained that they had worked with Thompson Koburn LLP and the Poppins Group LLC for their PTE assessment, and that they would provide me with records to prove the plant is de minimis. --------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 50257    **Concern Info** E-mail from Larry Weygandt: "Sorry To say it has gotten worse than better , who decided builders must use vacuum trucks and who watches there licenses and make sure they are doing there job correctly? Is the use of these trucks law , if so who wrote this law. I am fed up with your inaction on this problem this is a serious health matter to my family and neighbors I have attached pictures from last night also pictures from a recent heavy rain , also the run off is on the backside of the subdivision onto Hopewell road.  
My granddaughters spend a lot of time at our home during the summer swimming and playing outside one of them suffers from asthma, I am concerned about there health playing in the yard which they love to do. There is no telling what this dust contains. I am not going to let this situation go with out fighting for clean air , the use of water trucks I feel is the correct way to go . The argument about chlorine is nonsense since there is very little in our drinking water and that evaporates very quickly (as anybody with a chlorine pool knows .  
And the silt argument is just as silly just see what one rain does (picture ).  
What is more important humans are the streams which are being polluted with every rain more so than the little bit of sediment that gets by the sediment blocks in front of the inlets. This is not only caused by Lombardo Homes but also Fisher Homes (who uses the worst street sweepers) what is the answer. If this goes on I will be escalating who I contact about this Health problem.

Larry Weygandt "

**Comments** ?6/8/22 DBR - I forwarded the photos in Larry's e-mail to Joe Carson and Doug Nance with Lombardo Homes. They reached out to their street sweeping contractor to make sure that they were still using the sweepers with water. Joe Carson said that he believed the sweepers in the photographs were contracted by Fischer Homes. I also reached out to Connor Mercer with Fischer Homes, and forwarded the photos to see if they could identify them and if there was anything more that they could be doing to control dust. Connor responded on 6/22/22 and explained that they were now using water in their street sweepers at Amberleigh. I set up a time on Friday that we could observe the area while they were street sweeping.

6/24/22 SEL- I investigated the subdivision on Friday 6/24. Connor had replied that the street sweepers usually operate around 3. I arrived at the subdivision around 2:40pm. Upon arrival, I drove around the subdivision several times. On the majority of the roads, there was a minimal amount of dirt. There were areas where the dirt had accumulated, but still seemed to be under control. After driving around the subdivision, I parked in the mail area of the subdivision near the entrance and waited for the street sweepers. While waiting, I periodically drove around the subdivision to observe if any dust was being kicked up by regular vehicle traffic. I did not notice any concerning amount of dust kickup. I waited at the subdivision until 3:45 pm. During the time I was there, the street sweepers never came. At the time of the investigations, I did not observe any violations.

6/27/22 DBR - I e-mailed Larry to let him know what we've done and what our findings were.

------	-----------	-----------	--------------------------------------	-------	--------------	----

**Concern No.** 49360    **Concern Info** \*\*\*ONLINE CONCERN\*\*\* We live in Meadow Ridge subdivision and there is a property in the middle of our subdivision that for some zoning reason isn't a part of our subdivision. They have a commercial/agricultural business where they bring in dump trucks full of unidentified material, burn some, stop some and not sure what happens with the rest of it. Concerned about if they are burying hazardous material. Then, yesterday, April 11, we noticed an RV they have parked there. They ran a generator all night. Noise pollution and now a concern for what is happening with the sewer water? Any water run off. Our subdivision has its own sewer system and water as well.... Not sure how they are disposing of water or now they are even getting water?

\*\*The Concern was submitted twice by the same person with some varying detail. See second entry below\*\*

There is a commercial business in the middle of our subdivision. Not clear on what the business is but the owner has dump trucks full of unidentifiable items/materials brought in, through the residential subdivision and dumped in his property. The amount and frequency vary as well as the timing. Trucks come very early in the morning, sometimes after dark. Now he has a motorhome on the property. We are concerned that he could be bringing in hazardous material and burying it? Like a land fill?

**Concern No.** 49364    **Concern Info** I received a concern call from Richard Stokes (Rick) about the property located at Highway P & White Oak Road. The property is an old run down house he said that he wouldn't let his dog live in, along with a little trailer and a pre-built shed/cabin that has been brought in. He stated that they are constantly hauling in boats, cars, siding, etc. and will burn anything they can and have also been digging pits and burying who knows what. The hillside behind the place is full of trash and old cars etc. that can be seen this time of year before the trees are full and grass is grown up.  
  
He also said they previously had raw sewage going into a pit, however he contacted Jim Miller with Morgan County Health Department whom visited the site and spoke with the tenants. He thinks they have a septic system now. Jim told Mr. Stokes though that the health department has done about all they can. Jim gave him my phone number to see if the Department could assist in anyway now.  
  
Attached is a clip of the parcel and owner information. The concerned party would appreciate a call after investigating or if someone has already visited the site. Thank you.

### Concerns Investigated Between April 16, 2022 and June 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 49598    **Concern Info** Can anything be done about a party burning plastics or something else which produces a strong chemical smell on a regular basis? It may be a neighbor that is a contractor burning construction waste - I am not sure. I am concerned about our air quality and how it will affect my livestock as well. Some days a cloud of noxious gas hangs over my property.

**Comments** See SharePoint #1393 On May 10, 2022, I received an environmental concern, concerning the open burning of plastic and construction waste. On May 16, 2022, at approximately 10:00 a.m. I arrived to the area of concern and began my investigation at the coordinates provided in the concern document. There was a house at these coordinates, however, the house was in various stages of degradation, and had several dogs in the front yard. I did not feel comfortable making contact with the tenants. I made observations from the truck and did not see any areas of open burning. I then made my way closer to the address of the concerned party and noticed a larger burn pile on the neighboring property. I approached the concerned parties' home to determine if this was the burning being mentioned in the report, however, no one was home. I then went to the neighboring property, and came in contact with Kelley Williams. I provided my credentials, explained my reason for the visit was anonymous and did not specifically mention his property and asked for permission to view the burn pile. Initially Williams denied access because he had not burnt in the last few months and claimed to not burn regulated material, after which I had left the property. Soon after, Kelley had caught up to me at a stop sign and invited me back onto the property to view the burn pile. After viewing the burn pile on the Williams property, it was determined that the burning of regulated materials had occurred. Specifically, oil and anti-freeze containers, paint buckets, five gallon buckets, and various aerosol canisters. I explained to Williams that the open burning of household waste is not regulated but that does not include the regulated materials mentioned. I also informed Williams that the regulated material would need to be disposed of properly at a transfer station or landfill and to retain any receipts to prove disposal. Williams immediately expressed that he would cease illegal open burning and would clean up the mess right away. I explained that he would receive a letter of unsatisfactory finding and as long as proof of disposal was provided, that he would be returned to compliance. I then left Williams with a fact sheet pertaining to open burning and ended my investigation at 10:45 a.m. ?

<b>Concern No.</b> 49654		<b>Concern Info</b> Occupants are conducting open burning of materials beyond domestic trash. Fires are causing explosions and caller thinks the site may be a meth lab. The fires cause explosions at all hours of the night and morning. Most recent fire included a garage and mobile home and required home owner to rescue the mobile home occupant. Sheriff's department and the fire department have been involved. Site has open burning, solid waste disposal, and dumping. Dumping and burning in gully next to the garage that caught fire. Caller believes that the fire was arson. Occupants may or may not be the legal occupants of the site. The caller and husband rescued the older man that was inside the mobile home. But younger men were outside during the fire. The event occurred around 3:30 AM on April 22nd, 2022.

SWRO	6/9/2022	5/12/2022	Jerry Evans property owner Denali Waste Solution	Fairview Newton	Minor Wastewater Facility Odor	BM		
------	----------	-----------	--	--------------------	-----------------------------------	----	--	--

**Concern No.** 49658    **Concern Info** Over the past few months, when the wind blows from the south there is a terrible odor of what smells like a mix of human and pig waste. Living in a rural area I am used to fields being fertilized, but the smell is so awful that my children can't play outside. We can't open the windows to our home. After some inquiring, I found out that Denali Waste Solutions acquired a waste holding facility north of our town. They are then trucking out waste from the holding facility. The state of Maine has outlawed this type of holding facility already seeing the negative results it may have on the water supply and environment. Please, take the time to look into this concern and spend a period of time at the facility when trucks are being loaded and over a period of time. I live a few miles from the facility and the odor is horrendous at times and unnoticeable at others depending on the activity at the facility.

**Concern No.** 49982    **Concern Info** From Scott Starrett:  
I had a complaint on dumping of an old building in Branson being demolished being buried on this parcel in the County, 1368 Cedar Park Rd and have been informed that you have looked at this in the past for the same person. Ken Barth and/or Tim Barth Teten Farms. If you look on Beacon and use the Pictometry you can see this from 2019 aerials. They are bringing truck in now I've been told?  
  
Neighbor called and said that 20 to 30 loads of demolition debris from a bank have been dumped into a ravine on this day. In the past the property owner covers the debirs up at night. It was stated that debris from a funeral home, car wash, small motel and several homes have been dumped in this same location over the years. Question concerning asbestos being properly handled.

**Concern No.** 50056 **Concern Info** From email: Residence 3520 Peace Church Joplin, MO 64801. Related to Open Burning Under Missouri Regulations- Pub2047. Mailes Tree Service whose business address is not associated with the above address is hauling in tree trunks, tree limbs, and vegetation from his tree trimming business which far exceeds 80 cubic yards per week. They then proceed to burn the above stated waste after dark and on weekends. The fire never completely extinguishes and smoke is consistently infiltrating my home. No curtain incinerator is utilized in the burning of the above stated waste. In addition, there are occupied residential structures less than 200 yards from the site of the burning. This is a public health hazard and a nuisance to the surrounding residences. We have had increasing respiratory issues resulting from the resulting smoke and particulates in the air. The fire chief of Carl Junction MO has been contacted on multiple occasions with no results. The fire department stated "we have instructed them to stop burning". The Fire Department also stated that other neighbors have complained but there is nothing they can do about it. The Jasper County Sheriff's Department was also contacted with similar results. We have contacted the EPA in Springfield MO on 3 occasions with no results. We own close to 12 acres adjacent to this property and are unable to participate in any outdoor activities because of the constant smoke. The ashes from the fire are falling on our property and covering our cars. Approximately 1 year ago the fires were strong enough that embers traveled onto our property, over our home and burnt holes into a swimming pool cover. We are never able to open the windows of our home because the air is toxic. Please note that the individual owns a tree trimming service and are hauling a large amount of waste onto a property not associated with the business and then burning the waste. THIS WASTE DOES NOT ORIGINATE FROM THE ABOVE STATED PROPERTY.
